OBJECTIVE

HR-OD professional with hands-on experience in performance management, KPI design, and HR documentation. Recognized for analytical thinking and the ability to leverage AI and data tools to build practical HR solutions that drive clarity and accountability.

EDUCATION

King Khalid University 2018 – 2021
Bachelor of Business Administration — Marketing & E-commerce

EXPERIENCE

- HR Organizational Development Specialist | Al Nahdi Transport Company** Jan 2026 – Present
- Designed and standardized KPI frameworks across multiple departments to align performance measurement with organizational goals.
 - Enhanced the performance appraisal process by redesigning forms and developing a monthly follow-up framework.
 - Built a comprehensive L&D structure using the Kirkpatrick Model and conducted TNA to identify and address skill gaps.
 - Developed structured Interview Guides for department managers to support consistent talent acquisition.
 - Led employee engagement initiatives and managed internal communications for 170+ employees across branches.
 - Streamlined onboarding documentation to improve the new hire integration process.
- Data Entry & Field Supervisor | Almandaryah Company - Weqaa Project** Jan 2024 – May 2024
- Managed structured data entry processes ensuring high accuracy in official documentation and government correspondence.
 - Supervised field teams and optimized data collection workflows to improve reporting efficiency.
 - Coordinated between field and administrative units to maintain data integrity and compliance standards.
 - Proposed and implemented a vehicle checklist system to monitor equipment handover between field workers, resulting in a measurable reduction in maintenance costs.
- Receptionist | First Future Medical Complex** Nov 2023 – Jan 2024
- Managed appointment scheduling and front desk operations with professionalism.
 - Maintained accurate patient records to ensure service quality and continuity.
 - Proposed a Microsoft Teams integration to streamline real-time doctor availability tracking for reception staff.

PROJECTS

- Horizon — Enterprise ERP System** *(Personal Project)*
What began as a personal project to digitize the performance appraisal cycle has grown into Horizon, a full production-grade ERP system live at yahorizon.com. Built on Django 4.2 and PostgreSQL across 8 modules — Performance, Procurement, Recruitment/ATS, and dynamic role-based permissions, among others: 14,128 lines of code, 230 routes, and 48 database tables.
- HR Data Analysis & Workforce Dashboard** *(Personal Project)*
Demonstrated end-to-end HR analytics capability by processing a dataset of 1,470+ employee records in Excel, extracting turnover and workforce insights, and visualizing findings through an interactive Power BI dashboard.
- Training & Development Framework**
Designed and built a comprehensive L&D framework from scratch utilizing the Kirkpatrick Model, presented and approved by Al Nahdi Transport Company management, with a structured 90-day implementation plan currently in execution.
